

Vertical Prototype: Artifact 8

The objective of this artifact is to validate the project architecture by implementing two or more user stories, as well as to be familiarized with the technologies that were used. By clicking the following link, one gets access to the prototype: <http://gnomo.fe.up.pt/~lbaw1653/proto>.

Clicking in the “Login” button at the top right corner of the page, the credentials present in Table 1 can be used to access the page. The implemented user stories are present in Table 2.

Username	Password
teste	teste

Table 1: Credentials to access the page.

Identifier	Name	Priority	Description
UU01	Log in	high	As an unregistered user, I want to log in the web application, so that I can have registered user privileges.
UU02	Register	high	As an unregistered user, I want to register (using username, name, password, email address, phone contact and municipality) in the web application, so that I can later log in the system and have registered user privileges.
RU01	Log out	high	As a registered user, I want to log out, so that other people can't access my account.
RU03	Track Rentals/Reservations	medium	As a registered user, I want to track my rentals/reservations, so that I can check their details.
U03	View Complex	high	As a user, I want to be able to see a sports complex's page, so I can see what it has to offer.
RU09	Register Sports Complex	high	As a registered user, I want to register a sports complex (name, location, opening hours, contact information, PayPal account and a brief description), so that I can use the web application to manage it.
M04	Add Space	high	As a manager, I want to add a space to a sports complex (type of floor, coverage, sports applicable and price of rent per hour), so that I can manage the inventory and let my customers reserve said space.
M18	Manage Spaces	high	As a manager, I want to manage the spaces of a specific complex, so that I can edit their information.

Table 2: Implemented user stories.
